

C-ID Descriptor

Cultural Competence in Health and Social Services

Descriptor Details

- **Descriptor Title:** Cultural Competence in Health and Social Services
- **C-ID Number:** 104
- **Units:** 3
- **Date of Last Revision:** 9/18/2023 06:11:37 PM GMT+0000

General Description

This course examines the political, social, and theoretical perspectives of diverse populations as they relate to health and social services settings. The impact of health status, lifestyle and behavioral patterns, communication styles, socioeconomic status, personal prejudices, ethnic stereotyping, and cultural beliefs on individual and group access to health and social services will be investigated. Emphasis is placed on developing effective strategies to use with diverse populations as well as evaluating the effectiveness of existing health and social service programs.

Prerequisites

None

Corequisites

None

Advisories

English, one level below transfer (i.e., eligibility for English composition (C-ID ENGL 100) and reading a course with an exiting skill of ability to read a college level text.

Content

1. Definitions of relevant terms
 - A. Culture
 - B. Race
 - C. Ethnicity
 - D. Minority groups
 - E. Diversity
 - F. Socioeconomic status
 - G. Racism
 - H. Prejudices

Lab Activities

No information provided

Objectives

1. Define relevant terms including culture, race, ethnicity, minority groups, diversity, socioeconomic status, racism, prejudice, stereotyping, and cultural competence.
2. Identify characteristics and common health and social service needs of diverse population groups.
3. Analyze political and social issues relating to diverse population groups in health and social service settings.
4. Explain theoretical perspectives relating to how diverse population groups are approached and treated in health and social service settings, and the impact on health outcomes.
5. Identify beliefs, communication styles, socioeconomic status, and lifestyle and behavioral patterns of various cultures and social groups, and how they impact access to health and social services.
6. Examine both explicit and subtle dynamics of racism, prejudice, and stereotyping, and describe how they impact health and social service policies, utilization, interactions, and health outcomes.
7. Assess one's own cultural perspective, personal attitudes, assumptions, and stereotypes, and the potential impact of these on personal and professional interactions.
8. Evaluate existing health and social service program strategies for treating diverse populations, concentrating on the most effective strategies that have evidence-based results.

9. Recommend appropriate prevention, intervention, treatment, and empowerment and advocacy strategies in providing health and social services to diverse populations.
10. Demonstrate cultural competence practices including critical thinking and problem-solving skills when working with diverse populations.
